-

WORK EXPERIENCE

Archangel Technologies, Inc. (Mandaluyong City, Philippines)

May 2025 - March 2026

Software Developer (Full-Time)

- Collaborated with cross-functional teams to test and resolve user-reported issues from multiple clients in an employee timekeeping with VPN connection cross-platform application.
- Implemented new features like a version checker with automated updates, remember me on login and login with biometrics using fingerprint.
- Deployed an iOS app for internal testing using TestFlight in app store connect and also on app store for production.
- Set up and managed separate development, staging, and production environments for multiple clients to ensure stable deployments and minimize production issues.
- Optimized and Improved the API response time for getting the date and time by approximately 60–70%.

U&I Global (Brisbane, Australia)

February 2025 - March 2025

Freelance Web Developer (Project-Based)

- Re-engineered the U & I Global Expo website, enhancing user experience and streamlining the consultation booking process.
 - Improved UI/UX by implementing a modern, readable, responsive design using React and Tailwind CSS.
 - Optimized website performance by implementing (SPA) Single Page Application making the website load faster when navigating to other pages.
-

PROJECTS

Cartify - Full-stack eCommerce platform built with MERN stack, deployed on AWS. Migrated to Next.js with TypeScript for SSR, deployed on Vercel and Render.

Portfolio - Personal portfolio with an integrated AI assistant (kri4n.ai) powered by the Gemini API. Built with Next.js, ShadcnUI, TypeScript, Tailwind CSS, and Framer Motion.

FitMeter - Cross-platform fitness tracker mobile app built with Flutter/Dart and a Node.js + MongoDB backend. Enables users to create and track custom workout sessions.
